## 2 Introduction

The multiplier event in Greece took place on the 4<sup>th</sup> of November at the premises of the University of Thessaly. The building that hosted the event was the School of Agricultural Sciences at the University of Thessaly. The participants of the multiplier event were 53.

The main aim of the multiplier event was to present and disseminate the whole project including the objectives, results, and outputs as well as, the actions and dissemination activities. Before the end of the event, there was an open discussion, where the participants expressed their interest in learning more about the project and asked questions about it.

This report is an internal document of the partnership and will be available in electronic format, only. This document reflects only the partners' views and the European Union (EU) is not responsible for any use that might be made of the content of the information contained in it.

## 3 Multiplier Event Description

The event took place on the 4<sup>th</sup> of November and started at 9:30 am with the welcoming of the participants and a brief presentation of the organization.

Subsequently, a brief presentation of the project was made as well as an analysis of its objectives and results. The Intellectual Outputs "Practical Training Courses" and "Learning Motivation Environment" were presented in more detail. Additionally, the actions of the project were presented with photos from the Transnational Meetings and the Multiplier Events that had taken place in partner countries. The presentation also included newsletters, infographics/ press releases, and leaflets of the project.

Of course, we encouraged the participants to browse the social media platforms of the project and its website in order to get more informed. Most participants seemed to be interested in this since they scanned the QR codes with the page link.

After the end of all, an open discussion took place talking about the project's results and receiving comments and feedback from the participants. They were interested in learning more about the project and asked questions about it.

**The activities were related to the aims  
and objectives of the event.**

Moreover, 15 of the participants voted “agree” that the event activities (seminar, network, interactions, etc...) were relevant and well-balanced and the rest 38 answered, “totally agree”.

**The event activities (seminar, network,  
interactions, etc...) were relevant and  
well-balanced.**

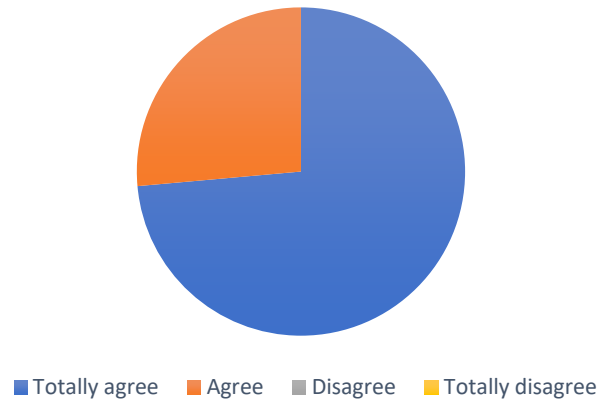

## 5.5 Level of the Materials

Moreover, 14 of the participants voted “agree” considering that the materials were pertinent, clear, and exhaustive and the rest 39 voted “totally agree”.

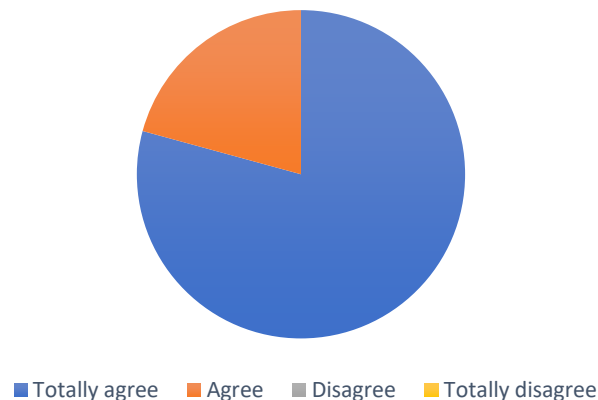

### The material was pertinent, clear and exhaustive.

## 5.6 Venue

In addition, 11 of the participants voted “agree” for the suitable venue that hosted the event while the rest of them voted “totally agree”.

### The venue chosen for the event was suitable.

## 6 Conclusions

Finally, the multiplier event achieved its goals. The participants seemed satisfied with the event, learned about the whole project, and were interested in its results and implementation. During the open discussion at the end of the event, their comments and
